

HEREFORD SALE PLANS TO BE MADE

Plans for annual sale of the San Joaquin Valley Hereford association will be discussed at a dinner meeting of association members to be held next Tuesday evening, August 3, 7:30 p.m. at the Farm Bureau office in Visalia.

Tentative date for the sale has been set as December of this year; it is expected that actual dates will be determined at the Tuesday meeting and that such matters will be discussed as the sifting of cattle for the sale, the number of cattle to be sold, sale officials and other items related to the sale.

The sale — the sixth annual event sponsored by the San Joaquin Valley Hereford association — features quality range bulls, although some females have been sold in the past. Location of the sale will be the Porterville fair grounds.

Heading the association this year is F. R. Farnsworth, White River cattleman; secretary is Theo. L. Cairns, of Lindsay.

OUR TOWN

Just whose big idea is it to start getting a road across our beautiful mountains to Lone Pine. Now our lovely back country will look like Sequoia, and Yosemite with all the people. Imagine a road through Funston meadow, all lined with beer bottles, and Kleenex. Oh, no! Where will we go on pack trips?

Down at the library it is interesting to watch the families and groups of people who pour over the big relief map there, deciding which route to take on their summer pack trip. I go along to watch, me and a horse don't see eye to eye.

Rosita and Ira Marks took their two boys, and Rickie Ferrier to the coast for a few days, and Rickie took the jack pot for the biggest catch, and they all agreed that the deep sea fishing out of Avila was wonderful.

Byron Wade and beautiful wife are home from a trip to Tahoe and places. They took along their son, Doug, and Ann Green, and had a grand trip. Mrs. Jap Elledge is home from a wonderful summer in Mexico where she has been going to school and touring the country. Daughter Kay Rudd and two children are visiting Mrs. Elledge and seeing old friends. Mary Hall

THE FARM SCENE

As Seen By Bill Reece

A NEW NEEDLE

If you haven't already heard about the new plan for the allocation of farm subsidies that is currently being talked about in the nation's capitol you undoubtedly will in the very near future. The plan calls for subsidies to be paid on a fixed acreage limitation basis rather than the present unlimited program.

As yet, no influential group has attempted to put it in the form of a bill but there are a number of prominently known congressmen who have stated that they favor the plan and will endorse it at an opportune time.

Briefly, the plan would fix by law the amount of subsidy payments any one farmer would be entitled to. It is assumed that the momentary value of the subsidized acres would be based upon parity scales which would guarantee the farmer an income the equivalent of his urban counterpart. No restrictions however,

would be imposed upon farmers who wished to plant in excess of their entitlement, but, of course no payments would be made over and above the fixed limitation.

The plan, no doubt, will prove popular with a good many persons if for no other reason than it is in direct contrast to the present unpopular one. About the only group who appear to be against it at this time are the operators of large farms and ranches who, of course, stand to lose if the plan were to be adopted.

Small farmers generally are almost certain to approve it because of the guarantee feature, in fact, the plan seems almost as though it was written with them in mind. Probably the largest group who will get behind it are the urbanites who will visualize a drop in their personal taxes as well as a drop in food prices.

Taking the plan on its face value, I would say that it's a bet.

(CONTINUED ON PAGE 2)

URMY RESIGNS AS MEMBER SCHOOL BOARD

Ralph Urmey, Springville, last night resigned as a member of the Porterville Union High School and College board of trustees, giving as his reason a "technicality," that makes it impossible for him to stay on the board and still serve as coordinator of patient services at the Springville sanitarium, a job that he starts August 1.

Mr. Urmey has served as a high school and college board member for two years; his term has one more year to go. Appointment to fill the vacancy is made by the county superintendent of schools.

The "technicality" is this: The educational program with which Mr. Urmey will be working in the Springville hospital is financed by funds obtained by schools through the county from Forest service sale of timber. The hospital program receives funds from both the Porterville high school district and the Springville elementary district. Under provisions of the school code, Mr. Urmey cannot.

(Continued On Page 8)

MENOMINEE TRUCK BEING RENOVATED

An old truck that served its time for the Italian-American Vineyard company on the coast some 40 years ago is now being renovated by Fred Tandrow and Eloy Bilhou of Porterville, who found the vehicle in a dilapidated condition near San Lucas.

The truck, a Menominee, is a half-ton job that was manufactured between 1910 and 1918 at Menominee, Michigan by the D. F. Poyer company. Mr. Bilhou and Mr. Tandrow have reworked the machine; Jess Smith constructed a wooden body as an exact duplicate of the original body and a paint job has the truck looking like new, or better.

Motor is in good shape and should be running, after the magnet is rewound, however, a rear end is being built up at present. No predictions are being made as to when the truck will be operating under its own power, but it is likely that it will be ready to join the growing numbers of "old cars" in the community that will be seen in the annual Veteran Homecoming parade November 11.

Williams Urges Unified State Water Department

Legislation to form a coordinated water resources department within the state of California was advocated by State Senator J. Howard Williams of Porterville, when he spoke this week before the water resources committee of the California state chamber of commerce in Los Angeles.

Senator Williams, chairman of a joint legislative committee on water problems and a recognized authority on the water situation in California, said that the unified water department is needed because of the growing importance of water in the state's economy.

He pointed out that under present law, seven different state agencies, are concerned with water problems. He said that because California is becoming a great industrial empire, water can no longer be considered for agricultural use only; he said that per capita use of water in the state is more than 1,100 gallons per day; that if adequate water for agricultural and industrial growth is to be made available, additional water projects must be started in order to fully utilize the water that is available to California.

Senator Williams has advocated a unified water department for several years not only as a medium through which state water can be protected and developed, but also as a body from which individuals and irrigation districts can get information and assistance with their own problems concerning water.

Four-Year Assembly Term Support Asked

Support of proposition No. 10 that will appear on the November ballot to provide four-year terms for state assemblymen and six-year terms for state senators is being urged by Roscoe Patterson, who is seeking a second term in the state assembly as representative from Tulare and Kings counties.

Mr. Patterson points out that turn-over in the state assembly averages 25 per cent per session; he believes that a four-year term, compared to the present two years, would place more emphasis on legislation and less on campaigning, while giving assemblymen a chance to secure experience that will tend to develop independence from pressure groups.

He said he believes the longer term would encourage many highly-qualified people to run for state offices — people who are now discouraged by the time and money required for campaigning.

BUDGET HEARING NEXT THURSDAY

Interested persons are invited to attend a public hearing on a proposed budget of \$1,114,350 for the 1954-55 school year at Porterville high school and college — the hearing is slated for 8:00 p.m., next Thursday evening, August 5, at the school.

Door Factory

Sequoia Door and Manufacturing company has started operation in its new, 19,200 square foot plant west of Tea Pot Dome; George R. Quinif, owner and operator, states that he hopes to hit full production within a month.

STATE ACREAGE DECLINES BUT CITRUS IS NUMBER ONE FOOD CROP IN CALIFORNIA

Although total acreage of citrus in California has declined by about 14 per cent in the last 10 years, citrus is the number one food crop raised in the state, and while citrus acreage is giving way before industrial growth and real estate development in southern California, centers of the citrus industry are shifting to Central California and to other rural areas of California and Arizona.

Offsetting any idea that the citrus industry is going out of business are figures given by Sunkist Growers, who sold, in 1953, a total of \$172,000,000 worth of citrus f.o.b. value. This was approximately \$6,000,000 more than the previous season, and 1954 is running well ahead of 1953. Ten-year f.o.b. average return, prior to World War II was only \$75,000.

Pressure from industrial and subdivision development in southern California has resulted in a 14 per cent decline in the state's citrus acreage, as citrus land is diverted to other uses, and another four per cent decline is expected during the next three years.

Sunkist Grower, officials, however, point out that much of the citrus acreage lost was older groves, some of them marginal producers, and that in the over-all picture, loss of this acreage actually put the sound grower in a better position to market his crop.

In California and Arizona at present 280,000 acres of citrus are under cultivation; they will produce about 15,000,000 boxes of Navel oranges, 20,000,000 boxes of Valencia oranges; 13,000,000 boxes of lemons and nearly 6,000,000 boxes of grapefruit this year. More than 150,000 persons will derive their entire livelihood from the citrus industry; twice that many will benefit from citrus in connection with transportation and distribution.

Paul S. Armstrong, general manager of Sunkist Growers states, "I have never known a better time to plant new citrus groves than today . . . Those with good

County Wheat Vote Favors Program 44-7

Wheat growers of Tulare county voted 44-7 in favor of a subsidy and control program, thereby joining in the thinking of wheat growers throughout the nation who cast a 73 per cent favorable vote.

Growers generally throughout the nation will take a 13 per cent cut in acreage in 1955; wheat acreage for Tulare county is 31,901 acres; California gets 477,950 acres and national allotment is 55 million acres, the floor below which allotments cannot go, by law.

Tulare county wheat growers have received notification as to their individual acreage for 1955, according to L. D. Flory, chairman, Tulare county agricultural stabilization committee.

HOMECOMING IS PLANNED OCT. 16

Annual Porterville College homecoming is being planned for the weekend of October 16, when Porterville college will play College of the Sequoias at Porterville. Al Browning, president of the college alumni association, states that a two-day program is under consideration and that work is already well underway on the compiling of addresses of some 3,000 graduates of the college.

production and quality fruit will be valuable property in the future. With our population increasing by two million a year, there will always be a market for high-quality fruit."

In view of current trend in citrus, Central California, with Tulare county as the key, is slated to become the major shipper of Navel oranges. Indication of value of citrus is seen in prices listed on county citrus acreages at present, and by the fact that there is a ready market for any good citrus acreage that is offered for sale.

A REMINDER — Youthful hunters, under 16 years of age who have never been issued a hunting license must possess a "Certificate of Competence" before they can obtain a license. Classes of instruction for junior hunters, through which the certificate is secured, are conducted in the southeastern Tulare county area by the Southern Tulare County Sportsmen's association. Details of the program can be obtained from Dr. Bill Baucom, telephone 804, Porterville, chairman of the sportsmen's committee that conducts the instruction school. A junior license must be carried by any boy or girl under 16 years of age who goes hunting.

MEMORIAL BOARD MEETING MONDAY

A routine meeting of the Porterville Memorial board will be held in the Porterville city hall the evening of August 2. Representatives from the firm Eddy and Deazy will be on hand to further discuss architectural plans for a proposed auditorium at Jaye and Olive streets in Porterville.

Raymond Nielson Manager Of SJVPPA

Raymond Nielson, director from district No. 5 of the San Joaquin Valley Poultry Producers association, has been named acting general manager of the association, replacing C. A. Heffernan, who recently resigned as general manager.

Urmey Resigns

(Continued From Page 1)
not serve on the school board and still receive pay from the school district, even though the money involved is not actually tax money.

Mr. Urmey is replacing A. A. Regdon in the Springville hospital patient service program.

Principal item of business for the special school board meeting was to consider bids for lights on the new Porterville college football field. Two bids were taken under consideration, A. C. Electric and Stievers Electric, the former with a base bid of \$22,245 and with a \$1,600 deduction on one alternate plan and a \$3,200 addition on a second alternate; the latter with a \$23,461 base bid but with a \$2,954 deduction on one alternate plan and a \$2,487 addition on the other alternate.

Work on the lighting system will start in the immediate future, with the job to be completed prior to the start of football season in the fall.

Meanwhile, steel forms are being put in place on the college site for a new stadium and grass is coming along in good shape on the football field. Architect Robert Kaestner stated last night that bids for the new college plant can be called in from four to five weeks after plans are approved by the state division of architecture — possibly within the next two weeks.

The board also discussed con-

struction of a teacher home at Johnsondale and gave informal approval to plan for a student union on the new college campus.

Trustee Ray Longley entered into the official minutes a report on inspection of the new high school gymnasium in which 12 items were listed as needing correction. Mr. Kaestner stated that the matter was being taken care of through himself and the contractor who built the gym.

The Farm Scene

ter one than the one we have at present. At least it will have the tendency to rid farming of the speculators who in the opinion of most farmers have done farming no good. Certainly no one should quarrel with the fact that the present program has acted to draw an element into the farm picture whose only purpose is to make a profit for themselves at the public's expense. Their mining tactics have left some farms of the nation in a disgraceful condition.

The one fault that I see with the new plan is that it seems to have been conceived out of utility. It suggests by inference that farmers have become hopelessly addicted to the support habit. It proposes not a cure, but simply to reduce and regulate the amount of the dosage. We're going to be allowed to keep the hypodermic but we'll have to change the size of the needle.

We Only Heard

By BILL RODGERS

CRITICISM OF the Tulare county grand jury for indictment of District-Attorney-Elect Bob Haden gives us some concern, for we feel that criticism is not justified — that those who are criticizing are overlooking some basic facts about the relationship between the grand jury and "the people."

QUESTION HERE is not whether Mr. Haden is guilty. That matter will be decided in a court of law. Basic question is, just what should we, as the people, expect from a grand jury.

ACTUALLY, A grand jury is a sort of grass-roots unit of justice. It is a body of citizens, under direction of a superior court judge, who concern themselves with the goings on in the county where they serve.

MEMBERS OF the grand jury check into various phases of county government, not as snoopers, but as representatives of you and me, the people. If what they find is good, they praise it; if what they find is not good, they condemn it, and in some cases, issue an indictment.

NOW, WHEN an indictment comes, it does not mean that an individual is necessarily guilty. It simply means that sufficient evidence of guilt has been presented to make further procedure the business of a court and a trial jury.

A GRAND jury — particularly a grand jury composed of men and women of the calibre of the present Tulare county grand jury — does not take the matter of indictment lightly. In a case where the person indicted is a prominent individual and a personal friend of some grand jury members, the task of indicting can be a tough, distasteful job, a job that individual members of the jury would do only because they have a sense of responsibility as citizens of a democratic nation.

TO ATTEMPT to accuse the grand jury of "politics," or "smear tactics" is absurd.

AND THERE is one other function of a grand jury. Anyone who believes that he has been unable to get justice elsewhere can appeal to the grand jury. Rich or poor, he can be heard — another aspect of the "grassroots" position of the jury.

SO IT is regrettable that members of the grand jury have come in for personal abuse as a result of their action as jurors. They may not always be right; they may be subject to human error just as all of us are, but they are sincere in their approach to grand jury work and they are men and women of considerable character and of excellent reputation in their own communities.

THEY SHOULD not be condemned for their actions; rather they should be praised for their work as members of one of the legal groups on which American justice is based.

Watermelon Party For Success 4-H

Success Valley 4-H Club members had a watermelon party recently at the Citrus South Tule School. Games were played and enjoyed by everyone.

During the party a report was given by Karen Mays on Junior Camp and the Five County Camp held at Whitaker forest. Another report was given by Kenley Mays on the Hi 4-H Camp. Members of the club attending camp were: Judith Larson, Karen Mays, Galen Mays, and Kenley Mays.

The following club members attended the watermelon party: Billy and David Sumpter, Davy Gunn, Sandra Becker, Judith Larson, Barbara and Janice Calkins, Danny Ramirez, Karen Mays, Kenley and Galen Mays, Alice Ramirez, Beatrice Ramirez, Alvin Ramirez, Dick Turner, Betty and Jaunita Turner.

Poplar News

Mrs. Ellsworth Sturgeon and boys have returned home after spending some time at San Diego, recently.

Mr. and Mrs. John Taggard and family spent the weekend recently with Mr. and Mrs. Kenneth Unser at their cabin at Camp Nelson.

Mr. and Mrs. Roy Langston and Mr. and Mrs. Frank Buda have returned from a fishing trip to Tuolumne meadows.

Porterville

W. J. TURNUPSEED, owner of the Turnupseed Electric Mfg. Co., at Porterville, California, points to his invention installed in a standard control panel.

Mr. Turnupseed has been specializing for the past 25 years in the rewinding of electrically powered agricultural pumping equipment and heavy industrial motors at his place of business in the farming community of Porterville, located in the southeastern part of Tulare county. In all, he holds three distinct patents for protective devices to save farmers thousands of dollars in repair bills and time lost in breakdowns.

His newest invention is known as the "TURNUPSEED PHASE FAILURE GUARD" and is the result of many years of effort to perfect a unit that would be simple to install, inexpensive to buy and yet give foolproof and instantaneous protection against the most common of all causes for motor burn-outs, single phasing.

The term single phasing is used to describe a condition that exists whenever a burned out fuse or open circuit occurs for any reason in one of the three main circuits supplying current to the motor through the starting equipment. Such an open circuit causes unbalanced current in the motor winding which results in single phasing and very rapidly burns out a phase group of coils in the motor.

According to the inventor of the guard, one of the most frequent reasons responsible for single phasing are ants and wasps who for some unaccountable reason find control boxes ideal sites to build their homes and raise their families. "These pests," says Mr. Turnupseed, "are 'stinging' the farmers for plenty."

Phase Failure Guard In Use

The Phase Failure Guard will operate effectively in any position on the panel, top, sides or bottom. It is a self contained unit and can be readily installed on either new or old equipment.

DO NOT CONFUSE THE "GUARD" WITH OTHER TYPES OF PROTECTORS

The standard overload relays, or bi-metallic types of motor protection devices are for overload protection ONLY. However, when the combination of the Phase Failure Guard and the overloads are used you are protected fully against both overloading and single phasing.

Here's **POSITIVE PROTECTION**
against burning out
3-phase electric motors!

New Invention by Valley Resident Is Expected to Save Farmers Thousands of Dollars Each Year.

A simple but foolproof device, invented by W. J. Turnupseed of Porterville, California, is being hailed as the greatest protective device ever patented to guard against the most common cause for motor burn-outs — **SINGLE PHASING.**

Under actual field tests the "Turnupseed Phase Failure Guard" has proven itself conclusively. **NOT ONE SINGLE ELECTRIC MOTOR HAS BURNED OUT DUE TO SINGLE PHASING WHEN PROTECTED BY THE "GUARD."**

An outstanding feature of the new invention is that it is unaffected by temperature changes, dust, corrosion, rust or insects. Under normal conditions the unit will last a lifetime.

It is simple to install and is readily adapted to either new or old equipment. It's the farmer's best insurance against costly repairs, time lost in breakdowns and damage to crops from loss of irrigation water. The cost of the protective guard is a fraction of the price a farmer has to pay for one motor rewind in the event of a burn-out.

SPRINGVILLE NEWS

By Winnie Gage

Mr. and Mrs. Sheldon Dickey and children of Kelleyville, Okla., Mr. and Mrs. Jack Dickey of Wichita, Kans., were recent guests of their sister, Mrs. Joe Mullens and family.

Weekend guests of Mr. and Mrs. Milt Walker were Mr. and Mrs. Jack Moore of Los Angeles, also visiting is Mrs. Walker's aunt, Mrs. Katie Curry of Oakland.

Mr. and Mrs. Raymond Doyle of Pasadena visited for a week in the summer home of Mr. and Mrs. Gail Shadinger of Visalia. Mrs. Doyle and Mrs. Sadinger are sisters.

Frank Haire and Herb Bliss, stone masons, of Springville, are completing the largest fireplace in Cedar Slope in the new cabin of Emery J. Smeck of Bakersfield. Upon its completion they will begin a fireplace for W. L. Bailey upon the new site of his new home.

Lloyd H. McCarvey has started a cabin on his lot recently purchased at Cedar Slope.

Mr. and Mrs. Delbert Henry and daughters were weekend guests of Delbert's parents, Mr. and Mrs. Albert Henry, of Modesto. They also visited Mrs. Henry's grandfather, Dave Dickey, in Turlock, who was seriously ill and who passed away Sunday, July 25.

Mr. and Mrs. Joe Mullens and son, Carl, and daughter, Betty, Mr. and Mrs. Red Mullens and children, Mrs. Delbert Henry and daughters all attended the funeral services in Turlock, Tuesday.

Mr. Dickey was the father of Mrs. Joe Mullens.

Mr. and Mrs. Arthur Gray closed Soda Springs Inn on Monday, July 19 through Thursday, July 22, in observance of their silver wedding

anniversary, which they spent at Morro Bay. The evening of July 22, the Gray family were served their anniversary supper, at The Breakers, on Morro Bay, an enjoyable affair which they will always remember, and which was attended also by their two children, Ronald and Judy. The Grays wish to thank their friends for the lovely gifts.

The Springville Volunteer Fire department has purchased a new, red fire truck, which it will also equip. The purchase was completed through cooperation of the 16 men of the fire department, headed by Chief Ted Stancliff, also with the cooperation in the Springville Utility district, which has been able to have the Underwriters lower the fire insurance rate about 40 per cent in the district. Also, five new water hydrants have been installed in Springville at two-block intervals, through efforts of the Springville Utility Board, Chamber of Commerce and the Fire Underwriters.

Encouraging reports are heard regarding the progress of the boys' honor camp now in operation on Bear Creek in the Balch Park area. Captain William Macklin, an officer of Soledad State Prison, in speaking before the Chamber of Commerce recently, advanced the following information:

Thirty boys are inmates of this camp at present, all of whom will have opportunity to learn a trade suited to their needs and to become useful citizens. The boys are here because of some infraction of the law, perhaps a minor one, and in some cases one of the more significant, and were selected by a committee who based the final decision upon the personal record of each prospective inmate. They were classified for the honor camp as worthy of the opportunity for rehabilitation, happiness, and additional learning.

A commendable readjustment of their lives must be made before they can be released, as camp officials consider the safety of the public and will not release anyone who would be a custodian risk or who would jeopardize the safety of the public.

Statistics prove that the morale of the camp boys is on the increase, and that 99 percent eventually are released; the other one percent, those who may be psychopathic, or who remain unadjusted, are screened and placed in the in-

stitution best suited to their requirements. Sixty percent of the boys released have returned to school, or found jobs and have not been returned to the camps.

Forester Metcalf says the boys adapt themselves readily to forestry, clean up logging litter, make and clean up trails, do road work, build retaining walls, do inside work such as painting the kitchen, cooking a meal, and other work.

Uniformed officers are selected for camp training, each boy must perform a full day's work, and one custodian manages 15 boys as a fire fighting crew. It has seemed best to keep ex-felons segregated from boys having less serious charges, but all work together faithfully when fighting fire.

The forestry division now has 600 of these honor inmates, and say they are well pleased by their work and their behavior.

The Bear Camp is a seasonal camp and will move to Coalinga for the winter.

There are no guns in the honor camps.

The boys leave camp only when attended by a camp leader or a forester; the boys are checked every two hours but hours are staggered so the inmates do not know when they are being checked. During the past six years, a total of only 5 escapes from the Soledad camp limits has been reported. The boy's parole is hastened in proportion to the quality of his work.

Statistics show that boys and men are making a better comeback than they did ten years ago, and that they are taking a pride in being a part of the Honor Camp system. Some of the boys have expressed themselves as feeling a sense of "protection" in the camp, others have said they feel a sense of security there.

Logging, clearing timber, and developing new park areas are among the favorite occupations of the boys. The boys are paid \$2.10 per day in forestry and 30 cents per hour for overtime when fighting fire, which lessens the burden on the taxpayer. Captain Macklin says the most serious disciplinary problems arise when the boys start an argument among themselves and that this is invariably over some matter that is very trivial.

One lieutenant and two other officers are on duty at the camp all the time. A daily record is kept of each inmate.

Captain William Macklin, who has spent a great portion of his life doing rehabilitation work in various prisons, feels encouraged over results being obtained through the Honor Camp system.

Rev. Jackson, Mrs. Eunice Witt and Miss Sylvia Wilde are attend-

Insecticides Can Influence Flavor In Olives

Musty off-flavor of olives, reported from three different areas of California recently, has been traced to certain insecticides by University of California research scientists.

Food technologist Reese H. Vaughn and pomologist Hudson T. Hartmann, on the Davis campus, found that the unusual musty flavor in canned ripe olives is caused by benzene hexachloride.

Tests at the University's Wolf-skill Experiment Orchard in Winters, show that when the chemical is sprayed on the leaves, applied to soil under the trees, or painted on fresh pruning cuts, the off-flavor may develop in processed fruits.

Lindane, a purified form of hexachloride, also produced the off-flavor.

If the insecticide drifts into olive groves from nearby crop fields, it will flavor the fruit, warn the researchers, and growers should guard against using the chemical around olives.

ing summer session school of Fresno State College at Visalia. The session continues for six weeks.

The Tule River Houndsmen Association is holding its second Field Trial at the Buckhorn Ranch owned by Bill Berry, president, on Sunday, Aug. 1, starting at 10:00 a.m. Buck Horn Ranch is 12 miles above Springville on Bear Creek road. Everyone is invited.

WE THE PEOPLE

Statements made in this column do not necessarily reflect the editorial opinion of The Farm Tribune.

The Farm Tribune
Porterville, Calif.

Please print in your paper these few lines. This is what I think about Success Dam.

If the dam is put in, I am afraid the people on the lower Tule river will not get the water that belongs to them.

I've seen dams on Tule river before. And the people on the Tule had to blow out dams to get any water. Now, if the government puts in this dam and takes our water and sells it to someone else, then there might be some more dams blown out.

Now, I don't want to see anything like that happen again. So, the government wants to be careful what it is doing.

Now, I disagree with Mr. Alex-

ander's statement about the damage and acreage flooded on the Tule in 1950. He said the Tule river did \$200,000 damage to crops. Maybe so. But the Tule water was a benefit of \$500,000. Also, he says 20,000 acres in the Lower Tule River Irrigation district was flooded. I've lived here on the lower Tule for 75 years and I have never seen that many acres under water from Tule river.

This is just what the people want down this way — a flood every five years. But we don't have a flood except once in 10 or 15 years. The dry years are what hurt the people along the Tule river, not the high water. The overflowing of Tule river has done more good than harm.

Tule river is such a small stream that most of the time the people along the river haven't half the water they need.

I have lived here a long time and I think I know something about the Tule. We have no water to spare.

JOHN WESSLING

462 Million pounds of butter was in storage as of June 30. This is greater than the combined peak stocks of 1952 and 1953 according to the USDA.

June, 1916

Dr. J. E. Daley has started circulating a petition to learn the sentiment of the taxpayers with regard to the recent refusal of the Porterville city council to accept the resignation of John L. Hazen as superintendent of streets. Last Monday night the resignation of Hazen was filed with the board. Dr. Daley told the council he would take over the position without pay if the appointment was given him. Hazen has been drawing \$75 per month.

J. F. Becker was in Porterville from the Springville district yesterday.

Howard Lyng has left for Portland where he will join his father who is in business there.

J. H. Grimsley, of Lindsay, was a visitor in Porterville recently.

A. Terwilliger is having lumber hauled to Doyle's for construction of a summer cabin there.

T. M. Gronen was a motor visitor from Terra Bella yesterday.

Miss Pearl Duncan and her mother, Mrs. M. H. Duncan, have arrived from Hanford to make their residence at Thurman and Third street.

Supervisor Morbach has secured an order to begin work on plans for a new concrete bridge over the Tule river at Success. It is expected the bridge will cost about \$6,000.

J. E. Scruggs, of Poplar, reports that he lost a cow from a rattlesnake bite.

Wilko Traeger, who sailed for Alaska the first of the month, writes that he intends to remain for at least a year.

Mrs. C. M. Willis has moved from the Congregational parsonage to her new home at the corner of Third and Mill streets.

Work has started on installation of the office fixtures in the new Mt. Whitney Power company's substation.

Nick Daviscourt, Canadian and Northwest champion wrestler, will meet Soldier Stroh in the American airdome next Wednesday evening. Stroh is the original masked marvel of the Pacific coast; the bout is under the auspices of the Porterville Baseball club.

M. J. Goodheart of Poplar has opened offices in the First National Bank building for his grain

brokerage business.

A range fire that threatened to become serious has been brought under control after burning several sections of pasture land on Zalud, Norton and adjoining property in the White River district.

Pleasant View District

Mr. and Mrs. Beecher of Pixley spent Sunday with Mr. and Mrs. William Jones.

Johnnie Warnock met with a painful accident Monday when a heavy cream can fell, striking him on the head.

Mrs. G. W. Betts and Mrs. D. F. Clark have gone to Hanford for a few days, going in the Clark auto.

Mrs. Magdalen Wilcox has gone to work for the Cloer Brothers, who have started their combine harvester.

The road crew is camped at John Hornsby's and are about to start oiling the Poplar roads.

Sermon in Miniature

By Everett C. Schneider, Minister
The Evangelical United Brethren Church

511 Third Street, Porterville

THEY ATE, THEY DRANK

We've almost become immune to headlines. "Scare" stories don't frighten us anymore. The fact that America seems to stand alone against the forces of Red aggression scarcely fazes us.

If our strength were as of Sir Galahad's, of whom it was said "my heart is pure," we would relish standing alone. But the fact is that our strength is not as "the strength of ten," nor "is our heart pure."

Our generation might be compared to what Jesus said of Noah's generation, "They ate, they drank,

they married, they were given in marriage until the day when Noah entered into the ark, and the flood came and destroyed them all." (Luke 17:27).

Eating and drinking in themselves is no sin, but what we eat and drink, and how we eat and drink may be a sin. Jesus said that we are to eat of his body and drink of his blood, partaking of his nature and of his sacrifices. We do this symbolically when we eat of the Communion elements, the bread and wine; and we do this spiritually when we confess Christ in our hearts and before men.

Have we satisfied the hungers of men in giving them the Bread of Life? Have we satisfied our own hungers by drinking of the Water of Life? Or have we been doing as Noah's generation, eating and drinking until the flood came and destroyed them?

Which said Parcel Four contains approximately 74 acres.

PARCEL FIVE:

Beginning at Southwest corner of Southeast Quarter of Section 12, Township 22 South, Range 27 East, M. D. B. & M.;

Thence East to the Southwest corner

NOTICE OF ELECTION

"IN THE MATTER OF THE FORMATION OF THE PROPOSED TEA POT DOME WATER DISTRICT."

NOTICE IS HEREBY GIVEN:

That an election has been called by the Board of Supervisors of the County of Tulare, and will be held on August 10, 1954, in the proposed district for the purpose of determining whether or not the proposed water district shall be formed and electing persons to fill the offices of the proposed district, if it is formed; and that

For the holding of the election the whole district, as proposed, shall be and constitute one election precinct, the boundaries of which shall be coterminous with the boundaries of the proposed district and the polling place in said precinct and the district and the house or place where the election will be held is:

The front vestibule of the E. K. Wales residence, situated on County Road 18E near its intersection with County Road 32N, the post office address of which place being Route 3, Box 1116, Porterville, California.

and the polls will be open between the hours of 10:00 o'clock in the forenoon and 5:00 o'clock in the afternoon of said day; and

The proposition, containing the name of the proposed district, to be voted upon at said election is:

PROPOSITION:

Shall the proposed TEA POT DOME WATER DISTRICT be formed under the provisions of California Water District Law, as amended, to be named the "TEA POT DOME WATER DISTRICT," located within the County of Tulare and having boundaries as heretofore on July 6th, 1954, established by the Board of Supervisors of Tulare County, California?"

and the offices for which candidates shall be elected at said election are: Five (5) Directors and one (1) person to fill the consolidated offices of Assessor, Tax Collector and Treasurer; and

Every person who is holder of title to land within the proposed district is, and no others are, qualified to vote at said election and all voters or legal representatives of voters may vote either in person or by proxy at said election; and

The boundaries of the proposed district located wholly within the County of Tulare, are described as follows:

DESCRIPTION OF BOUNDARIES

Parcels Or Portions Of Proposed Area Of The Proposed TEA POT DOME WATER DISTRICT As Finally Fixed

PARCEL ONE:

Beginning at the Northwest corner of the Southwest Quarter of Section 13, Township 22 South, Range 27 East, M. D. B. & M.;

A/3C Lena Dowling, who is assigned to the 567th Air Defense Group Headquarters squadron at McChord field, has been visiting in Porterville at the home of her mother.

Our Town

(Continued From Page One)

and Natalie Hodgson took a trip to Santa Cruz, picking up Doris Murry on the way. Doris is going to San Jose state to summer school. Doris Henderson and Norma Carroll packed back with uncle Willie Land. Caught lots of fish I bet with Willie along. Now they are home in the valley in this delightful heat. Mrs. Harry Womack and Mrs. Don McKillican had a surprise shower for Mrs. Pat Gage and new son. My Aunt Olo said the refreshments were delightful, and my Aunt Ola ought to know. Mrs. Ray Billingsley and Mrs. Charles Heard are staying at Nelson's for the rest of the summer. The report is, that they both feel much better after their recent bout with illness.

I've just finished a good book called, "Me and My Russian Wife," by Eddie Gilmore. If you like a little spice in your reading, mixed with quite a bit of Vodka, this is your book. Eddie Gilmore was in Russia during the last war as a war correspondent, and his literary experiences combined with finding a lovely Russian wife make for foamy reading. Wonder if my pet editor would consider sending me to Russia as a correspondent for this paper. I could learn to like Vodka. He more likely would be glad to pay for the air in the tires, if I would go out to Zante and see Columbus, and find out what he is building now.

Dr. and Mrs. Bob Karstaedt expect to move into their new home on Scenic Heights by October. Daughter Carolyn says she and mother go out every day and check on the progress. Doris Karstaedt is quite a golfer and wonders why

Max Denning Commanding Officer CAP Squadron 62

Max Denning has assumed command of Civil Air Patrol Squadron 62, Porterville, according to information released by Charles Haener, squadron public information officer; he replaces Freeland Wilson who is now commandant of cadets.

Haener also reports that over the coming weekend seven Civil Air Patrol squadrons will be working off the Porterville municipal field to find and mark aircraft

more women don't take advantage of a very good course. Women from Lindsay, Exeter, and Visalia come over, and I don't know whether it is Rudy's forceful personality, or just because they like our course. In Los Angeles, sometimes there is more than an hour to wait for a tee, and for some joker to get off the greens, but not here.

Jessie Burford and Hildreth Graves are going to Oxnard to take a course in painting from a teacher from Laguna. They will stay about 10 days, and paint to their hearts' content. There are many artists around Our Town, and they put out some good work. I would like to see an exhibit of their work. Do you do anything along the artistic lines? Why not?

Did you hear the story of the little girl who opened the door of the refrigerator and saw a little squirrel sitting there. She was quite surprised and asked him what he was doing there. He said, "This is a Westinghouse isn't it?" She said, "Yes." "Well," he said, "I'm westing."

Elton Wilcox insists he should wear Bermuda shorts and no one else. He was the first to volunteer the information that he has the cutest knees in Our Town.

wreckage in the Porterville and Coalinga areas.

Old wrecks will be located from the air, then marked by ground crews. This is an authorized CAP project.

The Porterville airport will be open to the public during the weekend operation; a number of planes are expected to be in and out during the two days.

AIR FORCE RECRUITING OFFICE IN POST OFFICE BLDG.

Recruiting office for the United States Air Force is located in Room 2, Post Office building, Porterville, under direction of M/Sgt. Wild Bill Begley. Since July 1, the Air Force has had operational control of its own recruiting service.

Need More Water Pressure?

Better Buy Myers

Have you outgrown your water system? Larger livestock herds, more farm buildings, a larger house and family can make a small pump work too hard, reduce water pressure, cause costly breakdowns.

Whatever your water requirements, there's a thrifty Myers water system to fill the bill. Guaranteed Myers' quality plus our experienced installation and service add up to dependable water delivery and adequate pressure for years.

We will be glad to give you a free estimate on the cost of a new Myers water system with adequate capacity and pressure for you now and in the future.

Write or phone today. No obligation.

By John

July has come and gone again and August is here so soon. You knew that, of course, but we mention the fact in case anyone has overlooked it. Come to think of it we would like to overlook it because selling plants in August is like selling ice boxes to Eskimos, or maybe worse, considering it's hotter here.

This is the time for starting fall gardens and by getting at it in the morning the weather is almost decent. Next time you wake up with a large ironing to do, take advantage of the situation and get away from it all by planting some luscious fall vegetables. Your husband, the rabbits, and everyone will appreciate it and by fall you may even feel rewarded yourself.

We do have an interesting new product called fly bait. It's a powder you just sprinkle around outside, requires no mixing, no spraying, actually easier than swatting flies — Unless you're equipped with a tail, in which case it's not worth the money. Sells for 75c a pound can and flies come for miles around just for a taste, then they're dead.

ARMY ENGINEERS DISCUSS VARIOUS ASPECTS OF SUCCESS DAM CONSTRUCTION IN LETTER SUBMITTED BY ALEXANDER

(Ed. Note: Following is the final section of a statement made by Bill Alexander, chief engineer for the Lower Tule River Irrigation district before the State Water Resources board in 1952 advocating construction of Success dam. In this part of the statement, he is answering a resolution by the Springville Farm Center, opposing the dam. Information from the Army engineers contained in a letter to Irvin Alt-house, Porterville engineer, is submitted in the statement by Mr. Alexander. Following is this letter, written by C. C. Haug, colonel, corps of engineers.)

This will acknowledge receipt of your letter of 26 May 1952 requesting certain information concerning the proposed Success Dam on Tule river, particularly in regard to our opinion as to the effect the dam will have on the underground flow of water in the Tule river canyon deposits downstream from the site of the proposed dam.

Tentative plans for Success dam call for an earthfill embankment, with relatively pervious outer zones, and an impervious central core. The impervious core will extend down through the more recent and more pervious sand and gravel deposits for an average depth of approximately 35 feet below the relatively flat valley floor, so as to cut off the flow of water in these more pervious upper deposits. However, the underground flow thus cut off will have the effect of increasing the water level in the reservoir and thus will not be lost but will be available for use by release through the outlet in the dam.

The portion of the valley fill lying below the proposed cut-off

has been investigated for a maximum depth of 100 feet below such cut-off, and consists of older, stratified streambed deposits in which relatively impervious and well consolidated material is separated by relatively thin strata of pervious water-bearing sand, gravel and cobble as several increments of depth.

It is also known that the valley fill extends to greater depths than those reached with our explorations. Present tentative plans provide for the installation of gravel-packed drainage wells, at the downstream toe of the dam, to depths of approximately 100 feet for the purpose of penetrating the older strata below the proposed cut-off, and of intercepting and of discharging at the ground surface level of sufficient portion of the underground water flow through such deposits so that the uplift pressures at the downstream toe of the dam will be reduced to provide an adequate factor of safety. This procedure will permit the deep underground flow to be passed safely and continue downstream from the dam.

Summarizing the foregoing, it is the opinion of this office that the current underground flow will be available, after the dam is constructed, partly as underground flow — the quantity depending on the head of water stored in the reservoir and on the effects of silt deposition in the reservoir — and partly as surface flow discharged through the outlet facilities and the drainage wells.

Our design studies for Success dam, now suspended due to lack of funds, are well along. Those studies show that although we have certain design problems, none of them are unprecedented. The principles of safe design for the proposed type of embankment and foundation treatment have been well established by tests and experience, are recognized by leading authorities in the engineering profession, and are established by both private and governmental organizations concerned with the design and construction of dams. There are many dams of the type proposed for Success dam that have been in service for many years and that have amply demonstrated their safe performance. (end of letter.)

Mr. Alexander now continues to quote from the Springville Farm Center resolution, then presents counter arguments.)

"WHEREAS, drying up the wells of the city of Porterville and the possible granting of the application of the Southern San Joaquin Municipal district for 100,000 acre feet of water from the damsite through condemnation."

There is not now and it is not foreseeable in the future that there could be made available 100,000 acre feet of water for the Southern San Joaquin Municipal district, or any other area over and above existing water rights.

"WHEREAS, the authorization of funds for the proposed dam would result in the condemnation of in excess of 5,000 productive acres of land, depriving many individuals of their homes and means of livelihood as well as removing this property from the tax rolls of Tulare county."

POSTMASTER: If addressee has removed or if undeliverable for any cause please notify sender on Form 3547.

The construction of any public project requires property acquisition for general public welfare, and these lands would have to be compensated for.

"WHEREAS, the project is indefensible as a flood control or an irrigation project and will cost vastly more than the estimated \$10,106,000 and be a flagrant waste of public funds."

This project is not indefensible as claimed. The Tule river basin will develop and increase in value upon the construction of this dam and the benefits derived from the project will also increase, justifying the project.

On behalf of the Lower Tule River Irrigation district, comprising 102,000 acres of the 140,000 acres of the Tule River fan, and the Tule Lake Water Storage basin, we earnestly solicit your board to recommend to the Congress of the United States that the necessary funds be appropriated to commence the immediate construction of Success dam on the Tule river. I wish to call your attention to Resolution No. 1546 of the City of Porterville, unanimously passed by the city council favoring the immediate construction of this project which has been presented to your board.

PEACH PICKERS NEEDED IN AREA

Two hundred peach pickers are wanted at the local Department of Employment office at 302 S. Main Street in Porterville, according to Dave Boyd, manager.

The work will start in about ten days and workers over 18 are urged to get in touch with the Employment Office by July 29 to get last minute information. The work will last about one full month and other work will be available when this job is completed.

Workers must be physically able to climb ladders.

NEW BOOKLET ON RED SPIDER MITES

A new booklet, "Red Spider Mites on Almonds," is available from the office of the Tulare county farm advisor.

OLD BATTERIES — BAD FLASH PICTURES...

Here's one of our good friend's tale of woe recently passed on to us: Said he: "My last roll of flash pictures all turned out black. I know nothing is wrong with my camera (an Argus C3) because all shots without the flash were perfect." His trouble was very simple, in spite of the aggravating results. His flash batteries were several years old! Although they had enough juice left in them to set off his bulbs, the light from the bulbs was reaching its peak of intensity too late. Two fresh batteries at 15c each solved his problem completely. How about your batteries? If they are older than about six months, better replace them now. It may save you the cost of a spoiled film to say nothing of your ruffled disposition. Stop in and see us real soon, won't you?

THE FARM SCENE

As Seen By Bill Reece

A NEW NEEDLE

If you haven't already heard about the new plan for the allocation of farm subsidies that is currently being talked about in the nation's capitol you undoubtedly will in the very near future. The plan calls for subsidies to be paid on a fixed acreage limitation basis rather than the present unlimited program.

As yet, no influential group has attempted to put it in the form of a bill but there are a number of prominently known congressmen who have stated that they favor the plan and will endorse it at an opportune time.

Briefly, the plan would fix by law the amount of subsidy payments any one farmer would be entitled to. It is assumed that the momentary value of the subsidized acres would be based upon parity scales which would guarantee the farmer an income the equivalent of his urban counterpart. No restrictions however, would be imposed upon farmers who wished to plant in excess of their entitlement, but, of course no payments would be made over and above the fixed limitation.

The plan, no doubt, will prove popular with a good many persons if for no other reason than it is in direct contrast to the present unpopular one. About the only group who appear to be against it at this time are the operators of large farms and ranches who, of course, stand to lose if the plan were to be adopted.

Small farmers generally are almost certain to approve it because of the guarantee feature, in fact, the plan seems almost as though it was written with them in mind. Probably the largest group who will get behind it are the urban-

ites who will visualize a drop in their personal taxes as well as a drop in food prices.

Taking the plan on its face value, I would say that it's a better one than the one we have at present. At least it will have the tendency to rid farming of the speculators who in the opinion of most farmers have done farming no good. Certainly no one should quarrel with the fact that the present program has acted to draw an element into the farm picture whose only purpose is to make a profit for themselves at the public's expense. Their mining tactics have left some farms of the nation in a disgraceful condition.

The one fault that I see with the new plan is that it seems to have been conceived out of futility. It suggests by inference that farmers have become hopelessly addicted to the support habit. It proposes not a cure, but simply to reduce and regulate the amount of the dosage. We're going to be allowed to keep the hypodermic but we'll have to change the size of the needle.

Raymond Nielson Manager Of SJVPPA

Raymond Nielson, director from district No. 5 of the San Joaquin Valley Poultry Producers association, has been named acting general manager of the association, replacing C. A. Heffernan, who recently resigned as general manager.

California oat crop this year is estimated at 6,120,000 bushels, considerably above last year and above the 10-year average.

Four-Year Assembly Term Support Asked

Support of proposition No. 10 that will appear on the November ballot to provide four-year terms for state assemblymen and six-year terms for state senators is being urged by Roscoe Patterson, who is seeking a second term in the state assembly as representative from Tulare and Kings counties.

Mr. Patterson points out that turn-over in the state assembly averages 25 per cent per session; he believes that a four-year term, compared to the present two years, would place more emphasis on legislation and less on campaigning, while giving assemblymen a chance to secure experience that will tend to develop independence from pressure groups.

He said he believes the longer term would encourage many highly-qualified people to run for state offices — people who are now discouraged by the time and money required for campaigning.

BUDGET HEARING NEXT THURSDAY

Interested persons are invited to attend a public hearing on a proposed budget of \$1,114,350 for the 1954-55 school year at Porterville high school and college — the hearing is slated for 8:00 p.m., next Thursday evening, August 5, at the school.

MEN ENLIST IN AIR FORCE

Southeastern Tulare county men who enlisted in the United States Air force since July 1 include: Jimmie H. Fought, Earlimart; Jimmie L. Routh, Ray D. Schlaepfer and Earl R. Barnett Jr., Porterville, and Pharis Masterson, Terra Bella.

Williams Urges Unified State Water Department

Legislation to form a coordinated water resources department within the state of California was advocated by State Senator J. Howard Williams of Porterville, when he spoke this week before the water resources committee of the California state chamber of commerce in Los Angeles.

Senator Williams, chairman of a joint legislative committee on water problems and a recognized authority on the water situation in California, said that the unified water department is needed because of the growing importance of water in the state's economy.

He pointed out that under present law, seven different state agencies, are concerned with water problems. He said that because California is becoming a great industrial empire, water can no longer be considered for agricultural use only; he said that per capita use of water in the state is more than 1,100 gallons per day; that if adequate water for agricultural and industrial growth is to be made available, additional water projects must be started in order to fully utilize the water that is available to California.

Senator Williams has advocated a unified water department for several years not only as a medium through which state water can be protected and developed, but also as a body from which individuals and irrigation districts can get information and assistance with their own problems concerning water.

HOMECOMING IS PLANNED OCT. 16

Annual Porterville College homecoming is being planned for the weekend of October 16, when Porterville college will play College of the Sequoias at Porterville. Al Browning, president of the college alumni association, states that a two-day program is under consideration and that work is already well underway on the compiling of addresses of some 3,000 graduates of the college.

Menominee Truck Being Renovated

An old truck that served its time for the Italian-American Vineyard company on the coast some 40 years ago is now being renovated by Fred Tandrow and Eloy Bilhou of Porterville, who found the vehicle in a dilapidated condition near San Lucas.

The truck, a Menominee, is a half-ton job that was manufactured between 1910 and 1918 at Menominee, Michigan by the D. F. Poyer company. Mr. Bilhou and Mr. Tandrow have reworked the machine; Jess Smith constructed a wooden body as an exact duplicate of the original body and a paint job has the truck looking like new, or better.

Motor is in good shape and should be running, after the magneto is rewound, however, a rear end is being built up at present. No predictions are being made as to when the truck will be operating under its own power, but it is likely that it will be ready to join the growing numbers of "old cars" in the community that will be seen in the annual Veteran Homecoming parade November 11.
